

Capital Improvements Plan Water & Sanitary Sewer Line Replacements City of Paris, Texas

The City of Paris has undertaken a \$35 million dollar water and sewer system rehabilitation project as part of their Capital Improvements Plan (CIP). Hayter Engineering has teamed with AECOM providing the engineering for this project.

This project consists of approximately 40 miles of water and sewer pipe. Hayter Engineering provided the data collection, utility coordination, and surveying for all of these lines. The surveying portion of the project was completed in 2014.

Hayter Engineering also designed 64,200 LF (36%) of water and sewer main replacement. Additionally, Hayter Engineering is assisting with the bidding services and construction management services.

Services provided by Hayter Engineering are listed at right.

This project is currently under construction with estimated completion in 2020.
