

## Texas Parks & Wildlife Department Boat Ramp - Lake Bob Sandlin, Titus County, TX Project ID: #F-185-B

Hayter Engineering assisted the Titus County Fresh Water District No. 1 to obtain a grant from the Texas Parks & Wildlife Department from their Boating Access Grant Program.

This grant was funded with \$292,500 in state funds which was 75% of the original project cost of \$390,000. Change Orders added 5 inch thick concrete instead of 6 inch rock and 2 inch asphalt to the parking lot and entrance road, a vinyl retaining wall to prevent soil erosion into the lake, and various added improvements to the restroom building and lighting facilities.

Services provided by Hayter Engineering are listed at right.

Improvements included a new 32 foot wide, two lane concrete boat ramp located along Ft. Sherman Dam Road on the eastern educe of Lake Bob Sandlin; a new fixed dock and sidewalks, parking lot and entrance road and new rest rooms.

This project was completed in 2009.
